

Foundation of Free Educative Services

Introduction & Intention

A service to ensure the possibility of education and training for job-level requirement to all people in the world. With costs being divided on a basic level to all people working because of training. A service offered worldwide with teachers being professional and experts in their jobfunctions.

Level of education

In this world public schools do not have a high level of education and private schools spend a lot of money to be outstanding. The level of this facility is aimed towards being an expert organisation giving all trainees a future of good income, good function and a profession that can compete with the best.

Costs & Dispensation

As we all know, education has its price. And the better the education the more the students have to pay for it. Almost making it only available for those with wealthy parents. The costs for the students in this kind of education is charged on those who have a job function. Thus making education free for all students on every level of expertise.

Obligatory

All students reach expert level and are sometime ready for a job. When they find a job they have income. And this foundation shares the costs on all those having a job being educated by this company. Therefore it is possible to let students learn without costs and still be avaiable to offer such a service.
